BioTissue Satellite Symposium Innovative Approaches for Cartilage Regeneration

At ICRS 2009 Miami—Florida, 24th May 1:15 p.m. – 2:15 p.m.

Dear colleagues,

we would like to invite you to the BioTissue Satellite Symposium at the ICRS 2009 Florida.

The 8th World Congress of the International Cartilage Repair Society under the slogan: Cartilage in Motion will take place on the 23-26th of May 2009 in Miami, Florida.

Our BioTissue Satellite Symposium will be on the 24th of May at 1:15 p.m.- 2:15 p.m. in the InterContinental Biscayne Bay Hotel in Miami, Florida.

At the symposium moderated by Professor René Verdonk, Belgium, we will present innovative approaches for cartilage regeneration. Thereby three outstanding experts will report about their promising preclinical and clinical experiences with the chondrotissue[®] matrix for microfracture procedures and the three-dimensional stable cartilage transplant BioSeed[®]-C.

Program:

- Christoph Erggelet, MD, Switzerland:
Biological cartilage regeneration methods with textile scaffold based technologies: clinical experiences with BioSeed[®]-C for the treatment of OA and preclinical data of chondrotissue[®]
- Thore Zantop, MD, Germany:
Preclinical and biomechanical data of chondrotissue[®]; arthroscopic fixation
- René Verdonk, MD, PhD, Belgium:
chondrotissue[®]: a new therapy concept for articular cartilage defects: first clinical experiences, multicenter clinical study

We are looking forward to seeing you at the BioTissue Satellite Symposium on the 24th of May 2009.
